Methylene Blue Analysis

CUSTOMER NAME: MICOR CORP. 800 Clarmont Ave. Bonsalem. PA. 19020

Your sample file strips have been tested for Workval quality (residual thiosulfate concentration). they were tested according to the methylene blue method described by the American Mational Standards Institute.

Concentrations of less than (C) 1.4 mg (alcrograms) indicate archival quality, and greater than (C) 1.4 mg indicate non-archival quality. The test is only examingful and accurate if performed no later than two weeks after processing. It is our understanding that we have received your file within the 2 week tice-frame.

Actual test readings are provided below, as well as "pass/fail" check marks.

TEST IDENT.	ACTUAL CONCENTRATION	HEETS ANSI STANDARD (<) 1.4 mg	ANSI STANDARD (>) 1.4 mg
MARRIASE BURIAU 1914-15, 16, 17	.11	/	

Archiyal quality, as ecoured by residual thissulfate concentration, is defined in AMSI standard 179.1-85 *A photographic file composed and irrated so that under archival storage conditions it is suitable for the preservation of records having personnel value*. This same Standard sets the archival limit at 1.4 mg for residual through the property of the property of

Methylene Blue Analysis

CUSTOMER NAME: MICOR CORP.

ADDRESS: 800 Clarmont Ave, Rentalem, PA. 14020

Your sample film strips have been tested for archival quality (residual thiosulfate concentration). they were tested according to the methylene blue method described by the American Mational Standards Institute.

Concentrations of less than (() 1.4 mg (aircograms) indicate archival quality, and greater them ()) 1.4 mg indicate non-archival quality. The test is only manningful and accurate if performed no later than two weeks after processing. It is our understanding that we have received your film within the 2 week time-frame.

Actual test readings are provided below, as well as "pass/fail" check marks.

/	

Archizal quality, as measured by residual thinouliste concentration, is defined in AMSI standard ITS.1-MS: "A photographic file composed and frasted so that under archival storage conditions it is sustable for the preservation of records having perasonal value". This same Standard sets the archival limit at 1.4 mg for residual thinoulists.
